DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 6, drawn to an electronic product comprising an alloy therein the alloy is composed of i types of metals and
$$-1 < z = \sum x_i z_i < 1,$$
wherein i is an integer greater than 1;
 x_i is the mole fraction of the i^{th} metal;
 z_i is the effective charge of the i^{th} metal; and
 z is the effective charge number of the alloy
classified in class 420, subclass 1+.
 - II. Claim 7, drawn to a method of designing an alloy comprising,
 - a) determining the effective charge number z of said alloy;
 - b) selecting i types of constituent metals wherein i is an integer greater than 1;

c) calculating the mole fraction x_i of each constituent metal according to the following formula:

$$z = \sum x_i z_i$$

$$x_1 + x_2 + \dots + x_i = 1$$

wherein z_i is the effective charge number of the i^{th} constituent metal, and

d) mixing said i types of constituent metals according to the mole fractions of Step c) and melting the mixture to form an alloy, classified in class 148, subclass 95+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed could be made by another and materially different process such as for example by trial and error.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Conclusion

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
